Peter Schiff sounded the alarm about the housing bubble created by the Federal Reserve and predicted the inevitable collapse of the bubble, but it was ignored by mainstream economists and ridiculed in the media. The Real Crash he's at it again, illustrating how the 2008 financial crisis is nothing compared to what goes down the road. Peter Schiff is right again. I hope more people listen this time. Ron Paul, Congressman (TX-14) and three-time presidential candidate New book Peter Schiff The Real Disaster, America's Further Bankruptcy is written in the same blunt and punchy style that makes him a favorite guest on my Fox News show. It's not just what he says, it's about what he lives by what he says. Unlike some authors who talk about business as spectators, Peter doesn't speak with an ivory tower of academic circles or from the comfort of an anchor chair. He runs real business and fights every day to make it successful despite all the government's tax and regulatory policies. Mike Huckabee: The show's host Huckabee and former Arkansas governor and America's presidential candidate were supposed to take Peter's 2007 book, Crash Proof, to heart before they tried to borrow, print and save us from trouble. He even explains how everyone can thrive on state stupidity in these dangerous times. And it does it all in a fresh and readable format. Judge Andrew Napolitano, senior judicial analyst, Fox News' Peter Schiff is an original thinker, a man of astounding insight and honesty, in many ways, a genius. I learned that you disagree with him at your peril. He is one of the few financial men about whom I would like to say that I have paid more attention. Live and learn. Read and learn. Easy money, higher tax rates and unbridled debt are a recipe for economic disaster. Let's hope Barack Obama reads this. Stephen Moore, an economist and Fox News commentator While many of us rightly focus on how high taxes are economically corrosive, Peter Schiff does a great job of explaining why government spending and debt are even worse. As we continue to grapple with the monster of runaway federal government, this book is one of the best assets conservatives can turn to in making a case for financial responsibility and capitalism. Grover Glenn Norquist; The president of Americans for Tax Reform, Peter Schiff, was one of the few experts who correctly predicted the economic and financial crash of 2008. Now, he makes a compelling argument in a highly read book that the day will come when the world will no longer trust the dollar and the ability of the U.S. government to pay its debts. I agree with him that then we will get a real accident.
